

In the Specification:

Please replace the paragraph beginning on page 11, line 18 with the following:

As described above, according to the first embodiment, ~~when~~ data of the minimum tone and the data of the maximum tone, for example, the data of the tone 0 and the data of the tone 255 in the case of the image data DTB of 8 bit, are used only for the data correction for improving response speed. Consequently, the aforesaid first problem is solved, so that the data correction for improving response speed can be made in all the areas. This makes it possible to improve response speed of liquid crystal in the liquid crystal display device.
